PROFESSIONAL SUMMARY

GenAI-focused Software Engineer with 1+ year of professional experience building production-ready LLM applications. Hands-on expertise in RAG pipelines, multi-agent systems, LangChain/LangGraph, and vector databases, backed by a strong full-stack foundation in React, FastAPI, and Node.js from enterprise development. Passionate about building intelligent AI systems that solve real-world problems.

TECHNICAL SKILLS

Languages:	Python · JavaScript · TypeScript · Java
GenAI / LLM:	LangChain · LangGraph · RAG · Multi-Agent Systems · ReAct · Prompt Engineering · Embeddings · Streaming · LLM APIs (Gemini, OpenAI) · Hugging Face
Vector Stores & DBs:	ChromaDB · MongoDB · PostgreSQL · MySQL · QdrantDB
Backend:	FastAPI · Node.js · Express.js · REST APIs · JWT · Pydantic
Frontend:	React.js · Next.js · Tailwind CSS · Vite
Tools & Infra	Docker · Git · GitHub Actions · CI/CD · Vercel · Render · Linux
Testing & Quality:	Postman (API Testing) · Integration Testing · Debugging

PROFESSIONAL EXPERIENCE

Software Developer Engineer **Aug 2025 – Present**
Innova Solutions Hyderabad, India

- Contributed to the development of the **TalentX recruitment platform**, building and enhancing real-time candidate tracking dashboards and user-facing workflows.
- Improved frontend performance by reducing page load time from **3.2s to 2.1s (34%)** through React state optimization and route-level code splitting.
- Built and maintained a **TypeScript-based design system with 25+ reusable components**, supporting consistency.
- Integrated and maintained **REST API workflows**, collaborating with backend teams to deliver end-to-end features and resolve integration issues.

Software Developer Engineer Intern **Oct 2024 – July 2025**
Innova Solutions Hyderabad, India

- Resolved **20+ JIRA tickets**, including bug fixes, UI issues, feature updates, and application improvements.
- Delivered **12+ frontend features** while collaborating with developers, QA engineers, and stakeholders throughout the development lifecycle.
- Performed **debugging, testing, and issue troubleshooting**, supporting application reliability and resolving frontend defects.

PROJECTS

Interactive AI Portfolio & Persona Assistant - React.js · Python · FastAPI · Groq API · Prompt Engineering **Live**

- Architected and deployed an interactive AI representative that answers recruiter queries in real-time with sub-300ms latency via Groq LPU inference and token streaming.
- Engineered production-grade system prompt guardrails featuring strict anti-hallucination constraints, first-person persona alignment, and domain-bounding rules to block out-of-scope queries.
- Built in-context document grounding over personal technical background, achieving 100% factual recall without retrieval latency overhead.

Multi-Agent Supervisor & Calculation Engine - Python · Groq API · Tavily · JSON Schema · Tool Calling **Github**

- Built a custom supervisor-based multi-agent orchestration loop from scratch using raw LLM API calls, delegating tasks across specialized Search and Math worker agents via structured JSON tool schemas.
- Implemented a two-level tool-calling pipeline integrating Tavily web search and a security-hardened arithmetic engine protected by regex validation and isolated execution scopes.
- Engineered a forced-synthesis fallback mechanism triggered at maximum delegation thresholds to prevent infinite recursive loops and mitigate API token drain.

Stateful Workflow Order Agent (LangGraph) - Python · LangGraph · LangChain · Groq **Github**

- Architected an automated ordering workflow using LangGraph StateGraph and TypedDict state schema, orchestrating a 5-node pipeline across order validation, inventory checks, cooking, and delivery.
- Implemented dynamic conditional edge routing and persistent retry counters in graph state to handle out-of-stock items, partial quantities, and kitchen execution failures.
- Built a resilient hybrid parsing engine combining LLM extraction with an automated rule-based fallback to guarantee system availability during API timeouts.

EDUCATION

Chitkara University (B.E. in Computer Science) CGPA: 9.31/10.0, Top 5% of Graduating Class
